About Us.....

We pride ourselves on our ability to offer an extensive, flexible, efficient and reliable service

Nash Industrial Services Ltd was founded in 2002 by Stephen Nash, having had 25 years experience working in both the Building and Quarrying Industries. The Company was established to specialise in good housekeeping within the Quarrying Industry.

Since then the Company has continued to grow and now employs over 80 highly skilled and experienced personnel with an extensive and varied clientele.

Working Towards a Cleaner Environment and a Safer Working Area

As a Company, Nash Industrial Services offer a complete range of Civil works and industrial and contract cleaning services. We are based in Buxton, Derbyshire and have built an enviable reputation within the local Quarrying Industry for our ability to provide an extensive, flexible and very reliable service whilst maintaining a sensible pricing policy.

Our personnel have the necessary knowledge and experience to deal with all types of industrial spillage and cleaning operations.

We offer Silo Cleaning using Gyro Whips for safe and efficient remote controlled silo cleaning, eliminating the need for dangerous, time consuming man entry operations.

We provide the latest technology in high volume, fast response spillage control from our Disab High Output Suction Tanker Unit, which is available to hire at competitive rates, operated by specially trained staff who are on call 24 hours a day.

SERVICES

Agricultural Tractor

Road Sweeper

MEWP's Articulated Boom

Articulated Loading Shovel

Pendant Operated Remote Controlled Gantry Crane

Civil

Concreting & Groundwork

New Builds & Renovations

Site Maintenance

Shot Blasting

DISAB VACUUM UNITS

The Disab Centurion LN200/0-1812HT Industrial Vacuum Unit is an important addition to our ever expanding Company.

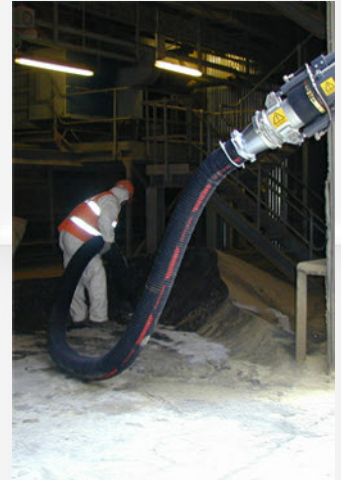

Manned by fully trained personnel, the unit can vacuum dry material such as sand, earth, cement as well as slurry or liquid substances and can be transported to any designated area.

The unit has a tip function that can be tipped directly into 1 tonne bags, as well as a high tip function that can be emptied directly into a skip

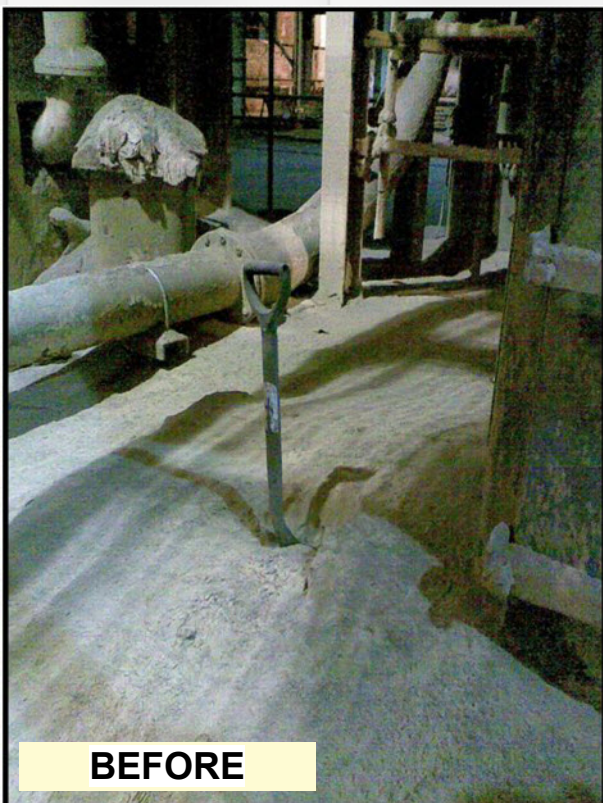

The unit can also be discharged directly form a hose outlet. It has telescopic boom that allows vacuuming to be achieved at a higher height without having to attach independent pipes or use a dry riser.

The DISAB unit is available for hire complete with driver / operator 24 hours a day.

Please do not hesitate to contact Nash Industrial Services Ltd today or call our friendly team on 0845 543 2665 to discuss the complete range of services we offer

SILO CLEANING

Gyro Whip Silo Cleaning

Safe, remote silo blockage removal

Under certain conditions materials such as cement, gypsum, coal, a variety of screenings and even grain will adhere to silo walls creating hang ups and blockages. These blockages significantly reduce the efficiency of your system, delay in production and / or bulk despatch and reducing storage capacity often leading to unplanned shutdowns and in some cases can cause a serious fire risk, serious commercial loss of unrecoverable material and even fatal accidents.

Where serious deposits have already built up or where the blockages with material are particularly tough, Gyro Whip technology offers the perfect solution.

The Gyro Whip offers a safe and fast solution to maintaining clean and continuous operating conditions in silos, bins and hoppers in the dry bulk manufacturing processing industry. With this system there is no need for operators to enter the potentially dangerous confines of bulk storage systems thus eliminating accidents.

The Gyro Whip is designed to be used remotely through a manhole opening at the top. Powered by compressed air, the Gyro Whip motor can be manoeuvred by one operator who manipulates the cleaning head by simple controls. A variety of whips and cutting edges can be fitted to the revolving cleaning head to remove even the toughest materials without damage to the silo, bin or hopper walls. The equipment is mobile and can be easily positioned at the cleaning location.

The motor drive is attached to a flexible hose that can extend down to 45 metres as standard. This makes the Gyro Whip system suitable for the majority of bulk storage and handling applications.

Special advantages of the Gyro Whip System

Gyro Whip is a wholly remote system, meaning there is no need for dangerous, time consuming man entry operation that could potentially put your staff in close proximity to hazardous unstable blockages and hang-ups.

The Gyro Whip cleaning process can be simply and quickly set up, yet is capable of delivering highly effective cleaning results in even the largest silos.

Constructed from light weight aluminium, the system is highly manoeuvrable. These materials, combined with compressed air drive system ensures no risk of sparking in zone 1 and 2 fire hazard areas.

The Gyro Whip is highly effective in use and is capable of removing even the toughest deposits of agricultural products, animal foodstuffs, cement, ores, process materials or clinker.

Because no man entry is required, production need not be interrupted during the cleaning process, making important savings in expensive downtime

Gyro Whip operation can be carried out by just two operators, so it doesn't make the excessive demands on highly qualified personnel that a correctly supervised and operated man entry operation would.

Gyro Whip Cleaning Applications

Because of it's flexibility, the Gyro Whip system is suitable for a vast range of silo, hopper and process vessel cleaning operations. Here are just some of the applications in which the system has a proven record...

Processing Industry

Cement, Clinker, Limestone, Iron Oxide, Gypsum, PFA, Sand, Coal, Aluminium Catalyst and a wide range of other powdered, pelleted and particulate materials.

Mining Operations

Gypsum, a wide range of Ores, Screenings, Potash and Zinc Oxide

Chemical Industry

Dicalcium Phosphate, Carbonates and Sulphur

Agricultural Applications

\grain, Rape Seed. Flour Husks, Wheat, Salt and Animal Food Stuffs.

CIVIL MAINTENANCE

Nash Industrial Services employ skilled personnel to meet any civil maintenance requirements. Whether building repairs and maintenance or stone and concrete work, we have the staff to undertake your project.

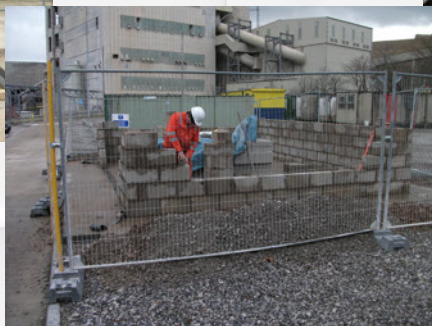

Services we offer include...

- Concrete & Stonework
- Paving & Kerbing
- Fencing
- Signage
- Groundwork's
- Site Maintenance
- New Build (Large or small scale)
- Building Repairs & Maintenance

Our Company has undertaken and successfully completed many large scale projects, including precision groundwork I.e. installing weighbridge's and foundations for major construction, and supplying and installing complete overhauls of site signage at two of the largest quarries in the UK We have also carried out major ducting work for underground cables. Our civil's client list is extensive and includes several quarries and power stations where we have been commended on our quality of work and our stringent Health & Safety Procedures

As a company we have built an excellent reputation with the local Quarrying Industry and pride ourselves on our ability to provide an extensive, flexible and very reliable service.

MACHINERY, PLANT & OPERATOR HIRE

Nash Industrial Services provide a wide range of plant machinery for all your daily on site needs. We offer equipment and operator hire on a daily, weekly or longer term basis at very competitive rates

Machinery Hire Includes...

- Mini Digger (with or without operator)
- Skid Steer/Bobcat (with or without operator)
- Dumper - 6 T (with or without operator)
- DISAB Vacuum Unit (including operators)

We Provide Operators for...

- Rigid Dumper (all sizes)
- Articulated Dumper
- Articulated Loading Shovel
- Fork Truck
- Skid Steer Loader
- Telescopic Handler
- Forward Tipping Dumper
- Agricultural Tractor
- Road Sweeper
- MEWP's Articulated Boom
- Pendant Operated Remote Controlled Gantry Crane

INVESTMENT IN TRAINING

Nash Industrial Services personnel undergo training for all jobs within the Company, whether large or small. Management work very closely with personnel to eradicate any difficulties and to ensure smooth operation of all tasks.

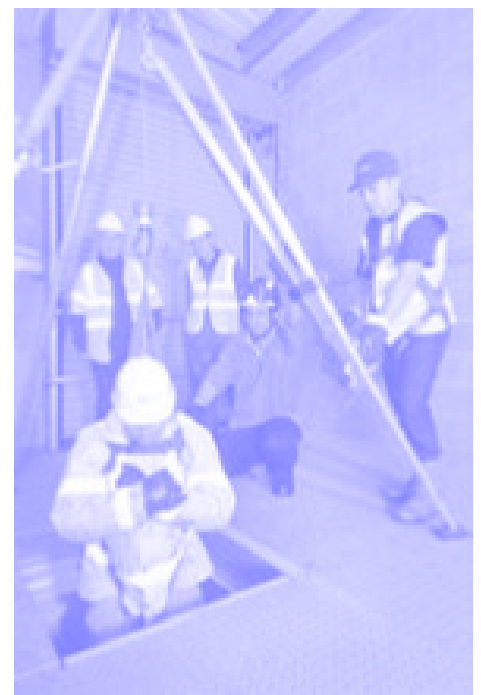

All our staff are EPIC qualified with a large number holding various machine operator licences to NVQ standard. Many of our personnel have passed out in block isolation, single isolation, working in confined spaces and working at heights.

Our staff training includes...

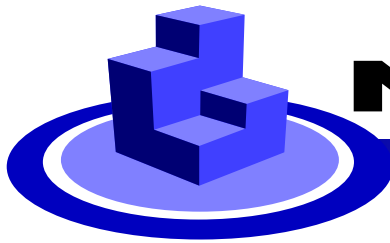

- Safety Passport (EPIC) for the Quarry Industry
- 5 Day Safety Management Training
- Plant Operator Training: Forward tipping dumpers - Forklift trucks - Telescopic handlers - Skid steer loaders - Articulated boom platforms - Cherry pickers - Pendant operated gantry crane - Agricultural tractor - Lorry mounted road sweeper/gully sucker - Articulated loading shovel
- Personal Protective Equipment Training
- Confined Space Training
- Working at Heights
- Job Specific Training I.e. Scania/Disab Tanker Unit

Nash Industrial Services have built an excellent reputation and pride ourselves on the high level of service that we offer. Our aim is to help you achieve a cleaner environment and safer working area

As a Company, we are committed to ensuring the highest levels of health, safety and environmental standards and employ our own Health & Safety Officer
